A PROVEN COATINGS MANUFACTURER WITH QUICK DEVELOPMENT & DELIVERY TIME

Stag Technologies, a division of the Vortex Companies, is an experienced developer and contract manufacturer of custom-formulated, high performance, coatings for the water, wastewater, and industrial marketplace.

Historically, our industry has been reliant on a hand full of conglomerate manufacturers to deliver formulated polymeric products to market.

This reliance has led to rigid and time exhaustive development for neoteric solutions to enter the market place.

Stag's ability to design, formulate and manufacture in-house, allows for quicker delivery on custom designed and thirdparty tested coatings.

COATINGS FOR EVERY SURFACE

Over the years we have developed and delivered coatings to protect surfaces made from a wide range of substrates.

INDUSTRIES SERVED

We currently develop standard and custom formulations for:

- > Water
- > Sewer
- > Industrial
- > Commercial

IN-HOUSE CAPABILITIES

Whether you are a general contractor, applicator or manage a facility maintenance crew, we will help you find a solution to your coatings needs.

Products:

- > Custom product development
- > Product formulation
- > Contract Manufacturing
- > Third-party testing coordination

Equipment:

- > Application systems
- > Custom built coating rigs

RANGE OF MATERIALS

Our coatings are environmentally friendly and developed and manufactured to the highest QA/QC and ASTM standards:

- > 100% solids epoxies
- > Polyureas
- > Polyurethanes
- > Hybrid epoxy/polyurea blends
- > Polyesters & polyaspartics
- > Chemical grouts
- > Mastics
- > MDI development

WE FORMULATE & MANUFACTURE COATINGS TO LAST

We are uniquely qualified to develop and manufacture a polymeric coating that specifically addresses your need:

- > Extreme weather conditions
- > Graffiti resistance
- > Corrosion resistance
- > UV resistance
- > Exceptional bond strength
- > High flex modulus

Need an equipment package to apply your custom coatings?
Stag will custom-build a coating application system rig for you.
